If product meets private competition we will play hard

Not affecting any factors and natural resources

Some citizens don't take waste collection seriously that's hard to take

Pride for contributing to the reduction of waste

THINK

We think about the environment cleanliness and proper management

production will be best

Empowered when given new tools to work

FEEL

Over-whelmed with the amount of work and working schedule

Following specific collection

DO

SMART WASTE MANAGEMENT SYSTEM (WASTE PICKER)

Items are not being separated properly

There should be a better way to communic ate with

the

command

centre

routes

Reports incidents found during the collection process

> More efficient collection routes

reduce waste and pollution **NEEDS**

Help

Usage of new technologies and techniques to help the collection

PAINS

Not being

sure about

containers

People not understanding the importance of segregating waste
